TJM XGS
SERIES 4000
Xtreme Gas Suspension

NISSAN NP300 NAVARA - COIL MODEL NEW TJM XGS SERIES 4000 SUSPENSION

Whether you're tackling corrugated roads, rough terrain, or you need to tow a caravan across the country, a TJM XGS Series 4000 suspension kit will improve every aspect of driving from road handling, braking ability, cushioning the ride from bumps and ruts, and noise and vibration, whilst also protecting the vehicle and its contents from wear and tear.

4WD's have factory engineered suspension, but it's usually only enough to accommodate a boot load of gear and general road driving or limited off-road driving. Installing a set of shock absorbers, a pair of springs or a full TJM XGS Series 4000 suspension kit will immediately transform your vehicle's ride handling, load carrying and towing capabilities. Don't forget to chat with your local TJM distributor about your individual suspension needs.

Features & benefits

- › 35mm lift front and rear for increased ground clearance
 - › Maximum allowable lift to conform to VSB 14
 - › To ensure CV life
 - › Front: 2 springs to cater for no load and HD for bullbar + winch
 - › Rear: 3 spring options 150kg, 350kg and 600kg constant load (including the OE style side tray which weighs 150kg)
- › Better load carrying than OE
- › Improved handling and steering response over OE
- › 40mm big bore piston shock absorbers deliver improved durability, less fade and better cooling over OE resulting in more consistent performance
- › After suspension height has been raised a front suspension camber adjustment kit and a rear suspension adjustable panhard is recommended to achieve correct wheel alignment. This is to maintain even tyre wear and vehicle tracking.
- › Field tested both on and off road to find the perfect suspension solution
- › Firm valve shock absorber option coming soon

Note: Please refer to the TJM Suspension Application Guide for part numbers.
